Fence Permit

Property Owner: _____
 Parcel Number(s): _____
 Address: _____
 Phone No: _____
 Email: _____
 Date Received: _____
 Decision: Approved Denied

Specific information. For most fences, a permit is not required. To verify whether a permit is needed, please fill out this page. Fence permits are subject to review under WMC 17.07.220, Fence regulations.

The following information will help define and enable staff to provide a timely review. This form is to document the fence location, height, and material. It is also to verify that the building official did or did not grant waivers, as provided in the code, such as a 6-foot fence in a front setback. A fence variance, however, is discretionary and requires public notice of the application and a public hearing to allow neighbors and people within 300 feet of the site to offer comments.

Fences cannot obscure vision at corners. When physical constraints exist on the property that prevents a property owner from providing a fence, a variance may be requested.
